WONDERGLASS

Dondolo takes inspiration from the Atomic Age, reflecting on a period that balanced optimism in technological innovation with awareness of its possible consequences. Its abstract organic forms recall the launch of the first satellite into orbit, a milestone in humankind's exploration of space. Inset glass discs capture and diffuse light within the work, suggesting both the mystery of cosmic darkness and the fragile hope of worlds beyond our own.

Limited edition of 8 units + 2 prototypes + 2 artist proofs.
