WONDERGLASS

Prism is composed of cast glass slabs whose vibrant tones gradually fade to complete transparency. Inspired by the refractive qualities of a prism, the work manipulates light to pass through and between the panels, creating shifting reflections and internal illumination. Each slab interacts with the next to produce a subtle choreography of refracted light, where colour, transparency, and form converge, showcasing the optical potential of cast glass.

Limited edition of 8 units + 2 prototypes + 2 artist proofs.

MATERIALS

Slab | Cast glass

Base | Metal

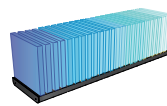

DIMENSIONS

W 1200 x D 430 x H 450 MM | 530 Kg

COLOURS

Slab | Blue gradient | Amber gradient

Base | Black
