DUNE

by Zaven, 2019

Dune is inspired by the desert landscape: soft, fluid, always moving. The two sides, composing every piece of the collection, speak to each other and melt through the Incalmo technique. The final objects play with the richness of glass colours and textures, in contrast with the cold perfection of LED light source and the roughness of the cargo belts that hold everything together.

Dune is currently available in crystal glass only. More colour options will be available soon.
