PLATEAU

by Kim Colin and Sam Hecht

WONDERGLASS

Plateau are unique vases designed by Kim Colin and Sam Hecht through a one-of-a-kind process. Glass is blown into a rounded shape, followed by its insertion into a L-shaped mould, until a square corner is formed along one side of the vase. With this deceptively simple technique of shaping rare equilibriums, the form permits this vase to fit, unusually, into exacting corners.

Numbered edition.

MATERIALS

Blown glass
